Meat Substitutes  By Gary C. Smith, PhD

Plant-based meat alternatives are gaining speed, but the first cultured beef patty took three months to grow in a laboratory at a cost of $332,000. Clearly, it’s going to be a long haul – what does the future hold for Meat Substitutes?

Listeria in South Africa: Lessons Learned  By Elsa Munro, PhD

The South African listeriosis outbreak last year ranks as the largest on record. To what extent was the quality of food inspection a contributing factor, given the absence of a requirement for HACCP? This article discusses what went wrong, what loopholes exist for potential contamination, and what can be done. Read more >

Did You Know?

We’re opening our 13th laboratory this fall! This lab will be the latest addition to our large national network of ISO 17025 accredited testing laboratories open 24/7/365.

Let’s Talk

We participate in the nation’s largest food safety events and look forward to learning more about your specific needs, and discussing how we can help. We are growing fast, and with that comes an awesome responsibility as we become your #1 partner for Food Safety, Certification & Audits, Education and Research.

“With our experience with FSNS since 2011 and are very pleased with the outstanding customer service and laboratory services they provide to Cal-Maine Foods.”

RYN LASTER, PH.D.
Director of Food Safety and Animal Welfare :: Cal-Maine Foods, Inc.
