2024 - 2025 FOOD SAFETY EDUCATION COURSES

BRCGS Food - Issue 9 Sites Training

This two-day course is part of the BRCGS Professional Recognition Programme and designed to enable participants to gain a full understanding of the general principles of the current BRC Standard and how to comply with the requirements. Attendees will also gain an understanding of what to expect during the process of certification and actions needed prior to, during and after the audit.

BRCGS Vulnerability Assessment for Food Fraud

This one-day course will provide you with a thorough understanding of vulnerability assessment for food fraud and enable you to use techniques to better identify and mitigate risks associated to raw materials in the supply chain.

FSPCA Preventive Controls for Animal Food

Preventive Controls for Animal Food regulation is intended to ensure safe manufacturing/processing, packing and holding of food products for animal consumption in the United States. The regulation requires that certain activities must be completed by a 'preventive controls qualified individual'. This course, developed by FSPCA, is the 'standardized curriculum' recognized by the FDA.

FSPCA Preventive Controls for Human Food

Preventive Controls for Human Food regulation is intended to ensure safe manufacturing/processing, packing, and holding of food products for human consumption in the United States. The regulation requires that certain activities must be completed by a 'preventive controls qualified individual'. This course, developed by FSPCA, is the 'standardized curriculum' recognized by the FDA.

FSSC 22000

FSSC 22000 is a Food Safety Management System (FSMS) Certification program that is recognized by the Global Food Safety Initiative (GFSI). In this course, participants will learn how to meet the requirement of the FSSC 22000 scheme.

HACCP Training Course

The HACCP course is designed to educate individuals in HACCP systems development, implementation, and management. The course is ideal for Plant HACCP Team Members, Plant Management Teams, Corporate Executives, and anyone whose job function will impact the facility HACCP Plan.

Advanced HACCP/Preventive Controls Training Course

To help HACCP/FSPCA-knowledgeable food production management individuals improve their food safety systems. This course covers in depth information regarding hazard analysis, risk assessment decision making, and robust verification and validation to support USDA and FDA food safety systems.

Internal Auditing Course

Internal Auditing is a one-day course that teaches attendees how to conduct internal audits within their facility to meet GFSI audit requirements. A comprehensive audit system is fundamental to a company's food safety and product quality program, provides confirmation that systems and procedures are operating effectively, and identifies areas that require improvement.

Microbiology and Food Safety 101 Course

This course will provide the fundamentals of food microbiology and an understanding of how microorganisms behave, how to control them, and raise awareness of the importance of process control, hygiene, and sanitation in the food processing environment.

Microbiology and Food Safety 202 Course

Advanced food safety microbiology. focus on the key pathogens that affect human health, detection of each within the laboratory, various methods used to test, techniques for confirmation such as cultural and molecular, and overview of the various serologies of each genus.

Discount when you sign up for Micro 101 and 202 at the same time.

Preventive Maintenance

This course covers the requirements of the BRC and SQF, USDA and FDA regulators, and provides essential understanding of the management of microbiological, chemical, and physical hazard risks that can present on a process floor and in the maintenance shop.

Sanitation: Management of Cleaning & Disinfecting in Food Environments

This course outlines the requirements for FDA and USDA regulations regarding cleaning and sanitizing. It addresses the science of cleaning and sanitation, how to prevent biofilm formation, and how to maintain sanitary conditions before and during operations, and things that should be emphasized in the management of sanitation procedures.

Sanitation Short Course

Targets front-line sanitors, janitors and FSQA techs performing pre-op inspections. Focus is on cleaning and sanitizing chemicals, safety, sanitation methods and pre-op technique.

Sanitary Design

This interactive class will present the 10 Principles for Equipment Sanitary Design and the 11 Principles of Facility Sanitary Design. Participants will have a clear understanding of potential microbiological/allergen hazards, regulatory requirements and the benefits of sanitary design.

SQF Training Course

This course can prepare you to become a SQF Practitioner and to implement the requirements of SQF Food Safety Code, v9.

Advanced SQF

This course is for current SQF Practitioners who are wanting more information on how to improve their current SQF system. Currently only offered as a private course.
